                                                                                                                                                                                                                                                                                                                                                                                                                                       STRAIN=Isolate 50410;
Patki A.H., Dale J.W.;
Submitted (APR-1991) to the EMBL/GenBank/DDBJ databases.
-!- SIMILARITY: Belongs to the mycobacterial PPE family.
-!- CAUTION: In strain Oshkosh the gene for this protein is interrupted in position 307 by an IS6110 element.
-!- CAUTION: Was originally (Ref.3) thought to be a dihydrofolate
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 62;
